

Incident Response Quick Guide

Use these five steps when responding to a workplace incident.

01 RESPOND
Pause the work and check the employee. Address any immediate hazards before doing anything else.

02 SUPPORT
Follow the injury-response procedure. Arrange appropriate assistance and notify the designated Safety contact.

03 GATHER
Collect the facts: who, what, when, where, witnesses, conditions, and actions taken.

04 DOCUMENT
Record what is known and observable. Be specific, accurate, and avoid assumptions.

05 FOLLOW THROUGH
Route required documentation, confirm hazards are addressed, and complete any required follow-up.
